WHAT IS BLOCKCHAIN ?

A digital database of ledger that is distributed among the nodes of a peer-to-peer network.

As each transaction occurs, it is recorded as a "block" of data. Those transactions show the movement of an asset that can be tangible (a product) or intangible (intellectual).

Each block is connected to the ones before and after it, These blocks form a chain of data as an asset moves from place to place or ownership changes hands.

Transactions are blocked together in an irreversible chain: a blockchain Each additional block strengthens the verification of the previous block and hence the entire blockchain.

WHAT IS *BITCOIN TRADING ?*

Traditionally, bitcoin trading has involved the buying and selling of the cryptocurrency on an exchange. But, you can also trade on bitcoin by speculating on its price movements using CFDs. These are a type of derivative – meaning you'll take a position on market movements without owning any underlying coins..

BINANCE SYSTEM

At Binance, we believe that everyone should have the freedom to earn, hold, spend, share and give their money - no matter who you are or where you come from.

Binance is the world's leading blockchain ecosystem, with a product suite that includes the largest digital asset exchange. Our mission is to be the infrastructure provider for crypto in tomorrow's world.

META VERSE

The Metaverse is a term often used to describe a collective virtual shared space, created by the convergence of virtually enhanced physical reality and persistent virtual worlds. It's a concept "Snow Crash" and later works like "Ready Player One" by Ernest Cline. In essence, the Metaverse is envisioned as an immersive, interconnected digital universe where people can interact with each other and digital environments in real-time, often through virtual reality (VR) or augmented reality (AR) technology.
